Fixed utility rail + workspace context

The far-left rail is now a compact global utility area. Workspace and project operations stay in their contextual panels, matching the reference layout while improving readability.

A. Fixed global rail

Only universal actions remain: Home, Search, Activity, AI Assistant, Messages, Notifications, Help, Admin and Profile.

B. Workspace switcher

Workspace selection, creation, members, permissions, audit logs and settings are always visible.

C. Project tree

Only projects belonging to the selected workspace are displayed.

D. Project features

Documents, AI, collaboration, ESG and R&D menus appear only after a project is selected.

Workspace overflow menu

- Open overview
- Rename workspace
- Manage members
- Manage permissions
- View audit logs
- Duplicate workspace
- Archive workspace
- Delete workspace
